

Level 3 Health and Social Care: Principles and Contexts

Guidance For Teaching
Unit 9

UNIT 9: INVESTIGATING CONTEMPORARY HEALTH AND SOCIAL CARE ISSUES IN WALES

Introduction:

The principal aim of this unit guide is to support teaching and learning and act as a companion to the Specification. Each unit guide offers a detailed explanation of key points in the Specification and aims to explain complex areas of subject content.

Programme of study:

The activities provided here are suggestions only for developing learner knowledge. Each centre must decide whether the activities are appropriate for their learners, and it is acknowledged that local conditions may determine the approach adopted. Although some of the suggested activities may involve sector engagement, please note that the majority of the activities are designed to take place within the classroom. Learners develop knowledge and understanding through the experience they acquire while carrying out each activity. Formative feedback is crucial to the learning, to ensure that the learner is developing the knowledge and skills necessary to achieve the best possible grades. Examples of activities have been given in this guidance that provide plenty of opportunity for formative feedback.

Overview of content:

Research is an important aspect of the health and social care sector. Research can help find answers to things that are unknown, fill gaps in knowledge, inform the development of new and revised legislation, policies and strategies, and transform the way that health and social care professionals deliver care.

In this unit, learners will understand the range of research undertaken in health and social care, who undertakes it and how it is presented and used to improve health and social care provision, and individual health and well-being in Wales.

Learners will develop the knowledge and skills to enable them to undertake their own secondary research into a contemporary issue of their choice and make recommendations for further research.

Assessment:

A non-examination assessment which requires candidates to undertake their own secondary research into a contemporary issue of their choice and make recommendations for further research.

The tasks for this non-examination assessment will remain the same for the lifetime of the specification and is as published in the Assessment Pack available from the WJEC secure website.

**An example of programme of study for Unit 9:
Investigating contemporary health and social care issues in Wales**

| Topic Area | Activities | Resources | Homework |
|---|---|---|--|
| 9.1 Contemporary issues in health and social care | <p>Introduction to unit content and assessment methods.</p> <p>Learners to decide what is meant by the key term 'Contemporary Issues'</p> <p>Learners to come up with a range of contemporary issues that are currently affecting individuals in Wales.</p> <p>Learners to create a mind map about different contemporary issues that they feel are affecting individuals in Wales.</p> <p>Learners to be given a news article or watch a news report about a contemporary issue.</p> | <ul style="list-style-type: none"> • The Office for National Statistics (ONS) https://www.ons.gov.uk/ • Public Health Wales (PHW) https://phw.nhs.wales/ • Stats Wales https://statswales.gov.wales/Catalogue • BBC News Wales Wales - BBC News • Wales Online WalesOnline: News, sport, weather and events from across Wales • ITV News Wales https://www.itv.com/news/wales | <p>WJEC online Resources.</p> <p>Learners to research contemporary issues in Wales.</p> <p>Learners to find a current news article about a contemporary issue Wales.</p> |
